DETAILED ACTION

This Office action is in response to the application filed May 4, 2005.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 7, 8 and 11-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over SATO et al (6,576,392 and 6,420,082).

The claimed invention is drawn to the following:

1. 1-Alkyl-1-dicyclohexyl (meth)acrylate represented by the following formula 1:

[Formula 1]

wherein R is a methyl or ethyl group, and R* is a hydrogen or a methyl group.

The SATO et al references disclose the exact monomer in column 43, lines 15-40, structures 27-29 in '392 and in column 45, line 25-45, structures 27-29 in '082. The monomers are disclosed to be use in a composition with a photoacid generator to function as a photoresist composition.

SATO et al lacks the use of the specifically claimed terpolymers used in a working example, however clearly suggest the use in copolymers with conventional monomers.

It would have been *prima facie* obvious to one of ordinary skill in the art of photoresist composition to use any of the listed monomer as disclosed above in a terpolymer and a photoacid

generator in a composition of SATO et al and reasonably expect same or similar result as recited in reference for sensitivity and pattern formation.

2. Claims 3-6, and 9-10 are allowed.

None of the prior art references of record disclose or anticipate the recited 2-alkyl-2-dicyclohexyl-5-norbornee-2-carboxylate monomer or its use in a copolymer.
